PROFESSIONAL SUMMARY

Junior Software Developer who enjoys turning ideas into clean, usable web experiences. I'm comfortable working with React and TypeScript, and I like breaking down messy problems until they make sense. I care about learning things properly, not just getting them to work, and I'm always open to picking up new tools and approaches as I grow.

EXPERIENCE

Junior Web Developer Intern| Partyjor| Jul 2025 - Present

- Contributed to a production **React (React.js) and TypeScript** web application, delivering **10+ UI features and bug fixes**, reducing reported UI issues during testing by **20%**
- Improved **responsiveness and usability** across desktop and mobile by implementing flexible layouts and refining component styling, resulting in more consistent rendering across devices
- Collaborated using **Git-based workflows**, independently pushing production ready changes
- Worked closely with designers to translate UI designs into functional components while meeting deadlines and maintaining code quality standards

PROJECTS

Hair Routine Tracker (Full-Stack Personal Project)
Next.js, TypeScript, Supabase, Tailwind

- Built a full-stack web application allowing users to log hair routines, products, and notes, with data persisted per user
- Designed a **relational database schema** and implemented authentication using **Supabase Auth**
- Focused on building a clear MVP by simplifying features and improving maintainability
- Practised end-to-end development: UI components, client-side state management, backend integration, and debugging

Stories Feature Clone(Frontend Project)
React, JavaScript, Tailwind

- Implemented a responsive stories feature allowing users to upload and view ephemeral content stored in **LocalStorage**
- Handled client-side data persistence, image processing (base64), and time-based content expiry
- Focused on reusable components and clean UI behaviour across screen sizes

EDUCATION

Cadbury Sixth Form College - A Levels in Computer Science, Mathematics, Business |
Sep 2023 - Jun 2025

KEY SKILLS

- **Programming skills:** React, Next.js, HTML, CSS, JavaScript, TypeScript, SQL
- **Technical Skills:** Git, GitHub, REST APIs, Supabase
- **Soft Skills:** Communication, collaboration, problem solving, time management, attention to detail
